Indian Standard
SPECIFICATION FOR
GLAZED FIRE-CLAY SANITARY APPLIANCES
PART III SPECIFIC REQUIREMENTS OF URINALS
Section I Slab Urinals
(*Second Revision*)

0. FOREWORD

0.1 This Indian Standard (Part III/Sec 1) (Second Revision) was adopted by the Indian Standards Institution on 4 May 1979, after the draft finalized by the Sanitary Appliances and Water Fittings Sectional Committee had been approved by the Civil Engineering Division Council.

0.2 This standard was first issued in 1958 and was revised in 1963 to cover requirements for additional glazed earthenware sanitary appliances, such as orissa pan, laboratory sink, squatting plate, slab and stall urinals and half-round channel. In this revision the scope of the standard has been restricted to cover requirements for glazed fire-clay sanitary appliances only since the glazed earthenware sanitary appliances were outdated as well as unhygienic. The Sectional Committee has found that only some of the sanitary appliances were being made in glazed fire-clay and therefore decided to cover the requirements for these appliances only in this revision. The general requirements applicable to all appliances and specific requirements for different types of appliances have been covered in separate parts of the standard. This standard (Part III/Sec 1) lays down the specific requirements of slab urinals.

0.3 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

*Rules for rounding off numerical values (*revised*).

IS : 771 (Part III/Sec 1) - 1979

1. SCOPE

1.1 This Indian Standard (Part III/Sec 1) lays down the patterns, sizes, construction, dimensions, tolerances and finish of slab urinals made of fire-clay.

2. REQUIREMENTS

2.1 General — The general requirements for materials, manufacture, methods of test, sampling and inspection shall conform to IS : 771 (Part I)-1979*.

2.2 Patterns and sizes — Slab urinals shall be of one of the following pattern and sizes:

a) Batter slab (see Fig. 1A)

1 000 × 600 mm or

1 000 × 400 mm

b) End slab (see Fig. 1B)

1 000 × 360 mm

All dimensions in millimetres.

FIG. 1 SLAB URINAL

*Specification for glazed fire-clay sanitary appliances: Part I General requirements (second revision).

2.2.1 The slab urinals may be made in other patterns and sizes where so agreed to between the manufacturer and the purchaser. However, tolerances on dimensions shall be as specified in this standard.

2.3 Construction — Slab urinals shall be manufactured either as a single urinal or as a range of two urinals as specified by the purchaser. The inside surface of the urinals shall be regular and smooth throughout to ensure efficient flushing.

2.4 Dimensions and Tolerances

2.4.1 Dimensions — Slab urinals shall conform to the dimensions given in Table 1 read with Fig. 1.

TABLE 1 DIMENSIONS OF SLAB URINALS

(Clause 2.2, and Fig. 1)

All dimensions in millimetres.

Sl. No.	PATTERN	SIZE	A	B	C	D	E
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
i)	Batter slab	1 000 × 600	1 000	600	50	80	25
		1 000 × 450	1 000	450	50	80	25
ii)	End slab	1 000 × 360	1 000	360	50	50	—

2.4.2 Tolerances — The following tolerances shall be allowed on the dimensions specified for slab urinals:

- a) On dimensions of 50 mm and over ± 4 percent
- b) On dimensions less than 50 mm ± 2 mm

3. MARKING

3.1 Each slab urinal shall be clearly and indelibly marked at a prominent place with the name or trade-mark of the manufacturer.

3.1.1 Each slab urinal conforming to the requirements specified in this standard may also be marked with the Standard Mark ,

NOTE — The use of the Standard Mark is governed by the provisions of the Bureau of Indian Standards Act, 1986 and the Rules and Regulations made thereunder. The Standard Mark on products covered by an Indian Standard conveys the assurance that they have been produced to comply with the requirements of that standard under a well defined system of inspection, testing and quality control which is devised and supervised by BIS and operated by the producer. Standard marked products are also continuously checked by BIS for conformity to that standard as a further safeguard. Details of conditions under which a licence for the use of the Standard Mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.
